

What is
AI Archive Marketing?
I'm not familiar with it.

Understand in 1 Minute AI ARCHIVE MARKETING

A new marketing approach that helps your company and products to be discovered when customers ask questions to AI.

It's not just showing ads, but a marketing method that **stores your information** so it can be found when people search and ask questions.

1 People now ask AI for information

Where can I find good collagen cosmetic products in Korea?

AI finds information for you!

ChatGPT
Google
YouTube
Gemini

2 Where does AI find the information?

AI refers to various information on the internet to provide the most reliable and helpful answers.

Company Profile
Product Information
News Articles
Certifications / Test Reports
Customer Reviews
Video Content

3 What is the difference from traditional marketing?

Traditional Advertising	AI Archive Marketing
We show ads!	We store information so it can be discovered!
- Show advertisements - Focus on short-term exposure - When ads stop → exposure stops - Focus on people's attention - Ad cost oriented	- Store and accumulate information - Build long-term digital assets - Content can be used continuously - Consider search and question situations - Build content assets

4 What is an AI Archive?

It is a digital information archive that organizes and creates content from a company's information and continuously stores it on the internet.

Company Profile
Product Features
Certification Materials
Production Facilities
News Articles
Overseas Export Information
AI ARCHIVE

5 How does it work?

Analyze Company Information → Create Content → AI Archive Accumulation → Expand Information that AI can reference → Customer Asks a Question → Company/Product Discovered

6 ELIM's Core Structure

A continuous marketing flow from customer questions to selection and broader exposure.

Question → Answer → Compare → Select → Expand → Circulate

Customers ask questions to AI → Provide information about our company and products → Compare with other products → Customers make a selection → Share through reviews, SNS, and buyers → More searches and questions are generated

7 Example for a Cosmetic Company

Information to be Archived

Company Profile
Product Features
Key Ingredients
Usage Purpose
Certifications / Test Reports
Production Facilities
Export Countries
Buyer Information
Product-Specific Content

8 So, what is the difference?

Not just a company that runs ads ❌

But a company with enough information to be explained when searched! ✅

9 Services Provided by ELIM

Web Archive 60 articles per month (720 per year)
SNS News Content 2 times per year (video production)
AI Infocommerce Video Brand contents video production
Overseas Buyer Matching Matching support in 30 countries
